

IOlxObject

```
classDiagram
    class IOlxObject
    class TOnSync
    class AActionHandler
    class ACollectionItem
    TOnSync --|> AActionHandler
    AActionHandler --|> ACollectionItem
    ACollectionItem --|> IOlxObject
```

The diagram illustrates a class hierarchy. At the top is the 'IOlxObject' class, enclosed in a dashed rectangular border. Below it are three solid-bordered rectangular boxes representing subclasses: 'ACollectionItem', 'AActionHandler', and 'TOnSync'. Vertical arrows point upwards from 'TOnSync' to 'AActionHandler', from 'AActionHandler' to 'ACollectionItem', and from 'ACollectionItem' to 'IOlxObject', indicating that each lower class inherits from the one above it.
