

IOlxObject

```
graph BT; TBasicApp_TActionHandler[TBasicApp::TActionHandler] --> AActionHandler[AActionHandler]; AActionHandler --> ACollectionItem[ACollectionItem]; ACollectionItem --> IOlxObject[IOlxObject];
```

The diagram illustrates a class hierarchy. At the base is the class `TBasicApp::TActionHandler`, represented by a solid rectangular box. An upward-pointing arrow connects it to the class `AActionHandler`, also in a solid rectangular box. Another upward-pointing arrow connects `AActionHandler` to `ACollectionItem`, which is in a solid rectangular box. A final upward-pointing arrow connects `ACollectionItem` to `IOlxObject`. The `IOlxObject` box is represented by a dashed rectangular border, indicating it might be an abstract or base class. The text labels are centered within their respective boxes.
